## 10<sup>th</sup> HyMeX Workshop

### 4-7 July 2017, Barcelona, Spain

#### General information

The 10<sup>th</sup> HyMeX workshop will take place from 4 to 7 July 2017, in Barcelona, Spain. It will be organized by the Water Research Institute (IdRA) and the Faculty of Physics from the University of Barcelona.

#### Objectives

The general objectives of all the HyMeX workshops are to present and discuss recent scientific progresses in the understanding of the Mediterranean water cycle, from multiscale and multidisciplinary approaches, as well as to foster collaborations within the HyMeX community. The 10<sup>th</sup> HyMeX workshop will be the first one after the programme's mid-term. It will be a good opportunity to show the advances of the new HyMeX science teams and to discuss plans about future field campaigns and coordinated modelling experiments, such as Med-CORDEX. Running over 4 days, the programme will consist of oral and poster sessions with an open call for contributions, as well as meetings of the teams.

#### Call for abstracts - **Deadline 17 March 2017**

We invite you to submit a short abstract for oral or poster presentation related to the Mediterranean water cycle. Themes of particular interest are: heavy precipitation, flash-flood and vulnerabilities, Mediterranean cyclones, ocean circulation and dense water formation, droughts and water resources. Contributions on recent advances in prediction and management of water cycle (and its link with renewable energy), its related hazards and their impacts, from nowcasting to climate scales, are also welcome.

Short abstracts can be submitted online at: [http://www.hymex.org/?page=private/workshops/10/abstract\\_submission](http://www.hymex.org/?page=private/workshops/10/abstract_submission)
